

SALUS CG LICENSE

SALUS CG LICENSE (COMMON GOOD) VERSION 1.0

Conditions under which the use of personal data is provided and authorized, including data on health and social circumstances. Acceptance of this license by any entity / project implies compliance with the following conditions in the use of personal data:

1. Only for biomedical research and health and / or social studies purposes:

Personal data will be used exclusively for biomedical research activities and health and / or social studies, which are of interest for the common good and / or which aim to advance the knowledge of relevant health and / or social problems. The projects that use the data must have obtained the approval of an accredited Clinical Research Ethics Committee (CREC) and obtain, where appropriate, the relevant informed consent. The authorized entities with which you share personal data will be considered Responsible for the treatment in compliance with the data protection regulations.

2. Maximum privacy and confidentiality:

For each research project or specific study, the entities that carry out the research and / or studies in health and / or social will adopt, as Data Controllers, the technical and organizational security measures necessary to guarantee a level of security appropriate to the sensitivity of the data, complying with the applicable data protection regulations in force at all times. Those responsible for the treatment undertake to communicate the technical and organizational security measures applied to personal data in the event that the interested parties request this information. The treatment carried out by authorized entities will always be done on data that cannot be linked to its owner without using additional information (pseudonymized data). In the event that a biomedical research project or study in health and / or social requires the use of personal data that allows the direct or indirect identification of the citizen, this circumstance will be determined by the study protocol itself and informed consent will be informed.

3. The data will not be used in any case for commercial purposes:

The projects will always be promoted and developed by non-commercial entities that carry out non-profit activities whose object is the common good and the general interest in improving the health and social welfare of citizens, and the resolution or improvement of relevant health and / or social problems. Research centers, researchers, universities, public institutions and foundations for the purpose of improving the health and social welfare of citizens will be the main destinations.

4. Results shared open and free:

The results obtained through the data will be published openly - free access and consultation for anyone who wants to know them, in an anonymized way - it will not be possible to directly or indirectly identify the citizens the data of which have been used in the health and / or social research studies, and will not require any financial consideration to access. These results will not be, in any case, reserved. Therefore, they will be disclosed and made available to the medical and scientific community at no cost.

5. Full control of the use made of personal data. License revocation:

The citizen may decide freely and at any time about the use made of their personal data. At any time and without the need for justification, the citizen may revoke the license or modify the conditions of access to the data as freely decided. The revocation of the license implies the non-use of the data for future projects or studies.

In this sense, in the event that the citizen wants to revoke the consent regarding their participation in a specific project or study, they should contact the authorized entity that carries it out (Data Controller) to revoke their participation in the project. The revocation of consent to participate in a specific project does not imply the revocation of this license, which will continue under the same conditions as those set forth herein.

In the event that modifications or updates are made to the license that affect the principles on which it is based, the citizen will be informed so that they are aware and can decide whether to maintain or revoke it.
